

SNACKING

a  SNAP! keynote

deep dives into consumer snacking behavior

consumer affinity by snack type

top-performing snacks at leading restaurant chains

snack type consumption indexed by daypart

operator adoption and approach to menuing snacks

how daypart impacts operators' snacking sales

Snacking has become much more than a holdover until the next meal – it is an ingrained cultural practice. Just about everyone loves a good snack. Most consumers snacked yesterday, and the majority of them snacked multiple times. Many foodservice operators are now equipped to cater to those looking to whet their appetites between meals. Datassential's Snacking Keynote covers everything on snacking, including the lowdown on trendy up-and-comers such as global and CBD-infused snacks. **So snack on these slides. We promise they won't ruin your appetite.**

SNACKING: a SNAP! keynote

Topics covered

understand how consumers feel about their snacks

- o learn which salty and sweet items are among consumers' most loved snacks
- o find out how consumers feel regarding the snacking options offered at the nation's largest chains, grocery stores, and convenience stores

explore the snacking habits of nearly 1,800 consumers

- o observe the differences between what snackers claim they indulge on and what they are actually consuming
- o identify behavioral differences in terms of snacking habits among numerous demographic slices, such as age, gender, and parental status

unravel the latest snacking trends offered by leading chains

- o dig into successful snacks and how consumer metrics such as purchase intent and uniqueness vary among different items
- o look closely at the latest trends like global snacks, alternative chips, and CBD-infused snacks, as well as classics like loaded fries and mini versions of classic dishes

discern how operators across segments approach snacking

- o see how snack type and daypart affect sales of snack items from a foodservice perspective
- o dive into the main drivers of sales among operator patrons

From the report

● CONSUMERS

96% of consumers had a snack food item yesterday

59% of overall snacks consumed were planned in advance

55% would pay more for an organic snack

● OPERATORS

97% menu snackable items somewhere on their menu

83% offer snack items during lunch time

68% consider snacks profitable to their operations overall

1,078 consumers + 738 snacking diary consumers

303 operators

METHODOLOGY

fielded online November 2019

1,078 consumers were surveyed overall

- A subset of this general-population sample, 738 consumers, is broken out in the Consumer Snacking Diary section in the report. Respondents who were excluded from that section had not consumed a snack in the past day at the time they took Datassential's online survey.

303 operators via the Datassential panel

- 141 restaurant operators
- 109 on-site operators
- 53 retail foodservice operators

full demographic info is available in the appendix

OBJECTIVES

- identify consumer snack consumption habits and preferences
- understand consumer motivations for and attitudes toward snacking at home and away from home
- analyze operator motivators, preferences, and challenges with menuing "snackable" items
- in-depth analysis of new menu items positioned as snacks
- identify supplier opportunities where operators and consumers have unmet snacking needs

Snack Definition

In this report, we define snacking differently for consumers vs. operators.

CONSUMER Definition:

In our custom survey, we asked consumers to consider snacks as “**anything that you ate or drank yesterday outside of what you would consider to be full meals**” regardless of daypart.

OPERATOR Definition:

Operators surveyed for this report were asked about snacking as a **distinct daypart between traditional meal service** of breakfast, lunch, and dinner. Snacks were designated as AM, PM (afternoon), or late-night. We also asked operators about “**snackable**” foods, such as tacos or fried appetizers, and about their general attitudes toward snacking.

Snack Food Categories

In this report we break snack food into **33 individual items** across four categories: **salty** snacks, **sweet** snacks, **natural** snacks, and **entrées**. Those categories are defined as such:

SALTY Snacks:

3 groups: **salty, crunchy snack foods** (like chips, pretzels, crackers, and cheese puffs) and **french fries**. All others fall into **other salty snacks**.

SWEET Snacks:

8 groups: **cookies, other sweet baked goods** (like brownies, muffins, and pie), **donuts, candy, ice cream, breakfast cereal**, and **snack bars** (including granola bars, protein bars, etc.). All others fall into **other sweet snacks**.

NATURAL Snacks:

11 groups: **fruit, veggies, salad, nuts, jerky, meat & cheese packs, cheese, yogurt, hummus**, and **trail mix**. All others fall into **other natural snacks**.

ENTRÉE Snacks:

11 groups: **sandwiches, burgers, pasta, pizza, burritos/tacos, hot dogs, chicken wings/nuggets, soup, eggs**, and **leftovers**. All others fall into **other entrées**.

Slide Legend

In addition to custom research, this report taps into Datassential's SNAP! platform. Refer to the stripe on the left side and the icon on the bottom right corner to learn the source of the slide's data.

n=varies

Operator B1: Approximately what percentage of your daily revenues come from each of the following dayparts? If you do not offer that daypart, enter a '0' in the space provided. Totals must add to 100%

Most consumers either already purchase snacks from most restaurant segments or are open to doing so.

Quick-service outlets are the most frequented for snacks, but nearly every segment has some purchase frequency or interest. Surprisingly, vending and kiosks hold no interest for nearly half of snacking consumers, perhaps because they do not have regular access to them (such as at work).

Snack Purchasing by Segment

	Snack Purchasing by Segment						% selecting
	Once per Week or More	Once every 2 Weeks	Once per Month	Less than Once per Month	Don't Purchase, but Open to Purchasing	Don't Purchase, Not Interested

Vending machine/micro market	8%	8%	8%	17%	13%	45%	

Although restaurants do little promotion around snacking, most consumers say they can easily find between-meal items on the menu. In addition, snack healthfulness and craveability are not mutually exclusive in customers' minds.
